5 The nonstatutory double patenting rejection is based on a
judicially created doctrine grounded in public policy (a policy
reflected in the statute) so as to prevent the unjustified or
improper timewise extension of the "right to exclude" granted by
a patent and to prevent possible harassment by multiple
10 assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.
Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.
1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982);
In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re*
Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

15 A timely filed terminal disclaimer in compliance with 37 CFR
1.321(c) may be used to overcome an actual or provisional
rejection based on a nonstatutory double patenting ground
provided the conflicting application or patent is shown to be
commonly owned with this application. See 37 CFR 1.130(b).

20 Effective January 1, 1994, a registered attorney or agent of
record may sign a terminal disclaimer. A terminal disclaimer
signed by the assignee must fully comply with 37 CFR 3.73(b).

Serial No. 10/050,441
Art Unit 1651

Claims 45-64, 66-84 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-50 of U.S. Patent No. 6,395,501. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '501 include an exogenous substrate and the present claims do not specify such a substrate. However, the present claims written in open-ended ~~comprising~~ terminology do not exclude such a substrate.

Claims 45-64, 66-84 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

Claim 45 lacks a correlating step at the end to accomplish the preamble. Claim 46 and all occurrences fails to further limit claim 45 from which it depends because claim 45 does not contain Mg+2 ion in step (d). Claim 63 may contain a typographical error. Claim 70 contains improper Markush terminology.

Serial No. 10/050,441
Art Unit 1651

Claim 65 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must be in the alternative. See MPEP § 608.01(n). Accordingly, the claim 65 has not been further treated on the merits.
